🐙 [github.com/Fn-studyo](https://github.com/Fn-studyo)

## Summary

Engineer valued for driving high-performance accessible web experiences. I develop quality, user-friendly products. Diplomatic, personable, and adept at managing sensitive situations. Highly organized, self-motivated, and proficient.

## Work experience

### Back End Developer

2021 - 2021

Loft

Developed the backend system from the ground.

Upgraded the technologies used from an older version to the latest versions.

Implemented fast and reliable data transformation and diffing mechanisms on the frontend for our data pipelines

Introduced and enforced a consistent coding style across the application.

Did a major re-engineering of the development workflow which led to an over 70% increase in development.

### Backend Developer(Full Stack)

2019 - 2020

Kolo Africa

A fintech startup aimed at simplifying saving and transferring money across west Africa.

Built backend applications for our internal use. Most especially Nodejs and MongoDB applications.

Crafted, audited and improved design, accessibility and overall experience of several products.

Enforced healthy codebases, coding style and standards. Completed projects on time and delivered to clients accordingly.

Communicated effectively with project managers and the team

### Back End Developer

2020-04 - 2021

Brimble

Building scalable web applications

Built rest api for deployment of frontend application

Worked actively on build SAAS internally for the company

### Back End Developer

2021-08 - 2021

2STO

A fintech startup aimed at simplifying saving and transferring money in European countries.

Built backend applications for our MVP. Most especially Nestjs and Postgres DB.

Hosted several internal projects on Amazon AWS.

Communicated effectively with project managers and the team

### Freelancer(FullStack)

- 2021

I worked with a backend developer from a fintech company to build and ship projects for clients.
